

## ' BE SAFE ' ACTIVITY

**"Seek Safety, Follow Safety, And Ensure Safety."**

Safety at home and school plays a vital role in creating a secure and nurturing environment for young learners. It helps protect students from hazards, accidents, and other potential risks while encouraging them to develop responsible habits from an early age. The Pre-Primary students were introduced to important safety rules through an engaging digital presentation conducted by their class teachers. They learned about playground safety, classroom discipline, and the importance of being careful while playing and interacting with others. Safety measures to be followed at home were also thoughtfully explained, including precautions against fire, handling sharp objects carefully, and responding appropriately to strangers. The activity helped our little learners become more aware, confident, and responsible about their own safety in a simple yet meaningful way.

Dressed charmingly in blue attire and carrying delightful blue toys, the little ones filled the campus with shades of serenity and happiness.
